

## PROGRAM MODELS

We understand that each culture, community, and country is unique, so our approach is too.

That's why we embrace three different program models with the same common goal: changing lives, one child at a time.

### Learning Centers

Most of our programs are Learning Centers. These after-school programs provide children with tutoring, mentorship, health care, and opportunities to hear about and experience Christ's love.

### Schools

From time to time, a local community is not equipped to provide access to education to the students we serve. In these contexts, VisionTrust has established a school, providing a safe learning environment where children get an education and also receive support in their health and spiritual development.

### Orphanages

Staying with family is best, but for some children family isn't an option. VisionTrust orphanages are run and staffed by locals with a heart for God, children, and service. Children and adolescent are provided with discipleship, educational support, nutritious meals, medical care, tutoring, and nurturing guidance 24-7 from dedicated caregivers.
